Enterprise Architect at Tata Consultancy Services  
Kolkata, West Bengal, India

## Summary

Experienced Solution Architect and Project Manager with over 16 years of hands-on experience in software development, technical leadership, and IT service delivery. Adept at bridging the gap between business goals and technical execution, with a strong record of success in designing scalable, high-performing solutions across diverse technology stacks.

Proven track record of collaborating with Product Owners, Business Stakeholders, Business Analysts, and cross-functional teams to gather, analyze, and refine business and technical requirements. Skilled in translating these into effective solution designs, epics, and user stories—striking the right balance between functional needs and technical feasibility.

Actively involved in designing and developing applications across modern middleware, Java, .NET, Python, React, Angular, and relational/NoSQL ecosystems. Committed to engineering excellence through code reviews, quality assurance practices, and driving teams toward writing clean, maintainable code. Well-versed in maintaining and evolving modern CI/CD pipelines in cloud-based environments.

Brings strong project management experience in service delivery, backed by excellent negotiation, analytical, and communication skills. A versatile and seasoned architect with expertise spanning Solution Architecture, Technical Architecture, Infrastructure Architecture, and Digital Architecture.
